LALIZAS

Simply life saving

LALIZAS was founded in Piraeus, Greece, in 1982 by Mr. Stavros Lalizas as a small manufacturing plant producing buoyancy aids for professional sailing.

Today, LALIZAS holds a leading position in the European Marine market with many years of experience and expertise in life saving equipment. Having manufactured and sold millions of life jackets, LALIZAS is associated with loyal clients all over the world, in both the recreational and the commercial sector.

LALIZAS life saving products are designed and manufactured under the strictest quality control with ISO 9001 verification, in order to meet the standards set by international notified bodies such as Germanischer Lloyd, Bureau Veritas and Lloyd's Register.

Product categories:

Lifejackets (Foam-filled and inflatable), liferafts, MOB devices and navigation lights.

Lofrans was founded in Monza, Italy, in 1966 and since then has been dedicated to designing and manufacturing high quality windlasses and anchor management solutions that combine top performance, absolute safety and style.

For many decades Lofrans enriches the market with innovative solutions, continuing its tradition as “the original windlass”, having loyal customers all over the world. The Italian brand offers an impressive line-up of high quality anchoring solutions for boats and Mega yachts from 6 m. to 150 m. (20ft - 500 ft).

The Zeus windlass line for Mega Yachts, allows the brand to fully serve the Mega Yacht market, providing customized solutions for the most demanding customers.

Today the Lofrans production and logistics processes have been massively upgraded with cutting-edge technology, IT systems and new automated warehouses.

Product Categories:

Vertical and Horizontal windlasses, Capstans, Custom anchoring solutions for Mega Yachts.

MAX POWER

CONTROL TO THE MAX

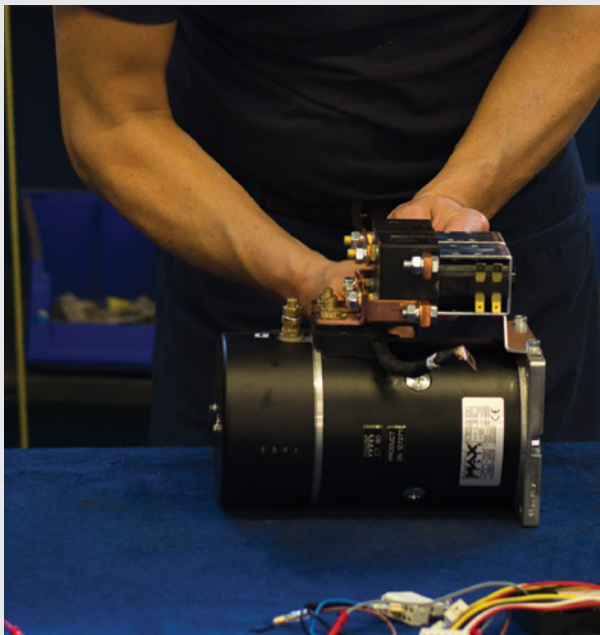

Founded in 1987, in Mandelieu, France, Max Power has developed a full vessel maneuverability range, from simple tunnel thrusters to top-of-the-range compact retractable thrusters, destined for boats of all types and sizes.

With respect to its past and a continuous tendency to improvement, at the end of 2012 the complete production moved to Monza, Italy. Within two years there have been applied investments in upgrading the production procedures, the quality control systems and the logistics structure. Investments also include a tailor-made WMS (Warehouse Management Systems).

Renowned for supplying high quality products, Max Power designs and produces innovative and unique bow and stern thrusters delivering the ultimate performance into the world of everyday yachting.

Product Categories:

Tunnel and retractable thrusters (electric/hydraulic), stern pod thrusters, control panels and Integrated Hydraulic Solutions.

Nuova Rade was founded in 1955 in Italy and since then is a leading company in design, production and sales of marine plastic accessories.

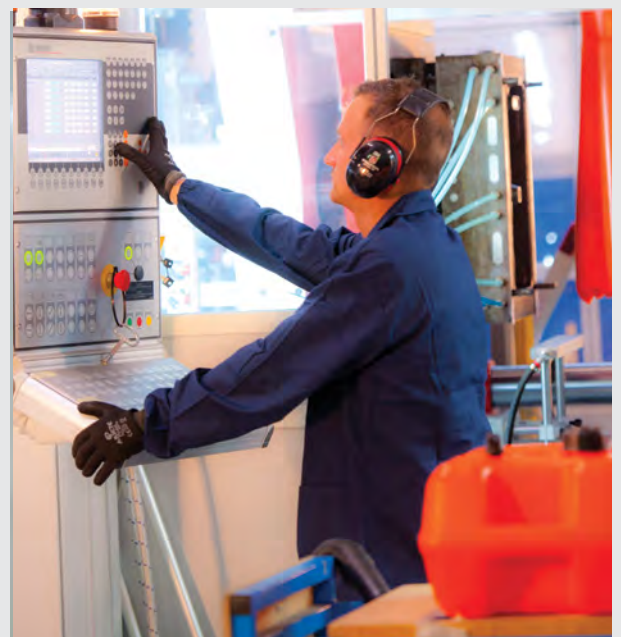

As a result of this long industrial experience, continuous research and development, Nuova Rade possesses an extraordinary expertise placed at the disposal of yachtsmen and boating professionals all over the world.

Many boat builders all over the world have been using the products of Nuova Rade for years, providing them with durability and style for their boats.

During all these decades, Nuova Rade has developed completely automated production procedures, having injection, rotational and blow molding machinery, resulting in a wide range of high quality marine plastic products.

Product categories:

Hatches, Tanks, Plumbing & ventilation, Deck equipment, and accessories for the Engine, for Mooring and Fishing.

"FENDING", INNOVATION AND EXCELLENCE

Since 1985, OCEAN manufactures the unique range of Solid Boat Fenders, which are made of Flexible Integral PU Skin Foam.

After so many years of superior quality, the latest investments in R&D and production enrich the already successful lineup with the new "Classic" series of inflatable boat fenders that offer excellent protection at affordable prices.

With the addition of the "Magnus" series, which are our newest proposal for the protection of Mega yachts, OCEAN offers a complete range of boat fenders for yachts from 3 m. to 80 m.

In 2015, OCEAN opened its new production plant of 13,000 m², which is the largest manufacturing facility in the world for the production of boat fenders.

In an effort to rise to the top, and to become the largest manufacturer of boat fenders in the market, OCEAN is constantly investing in new products and technologies.

Product Categories:

Solid (PU) fenders, Inflatable heavy duty fenders and Dock fenders.
